

Dear Sirs and Madams,  
I urge you to REJECT the National Association of Broadcaster's petition 04-160.

I benefit tremendously from XM Radio's broadcast of local weather and traffic. I commute every day into downtown Chicago, and have chosen XM Radio as my efficient source of weather and traffic. The local AM/FM drive-time broadcasts do not fit my need of IMMEDIATE updates to traffic or the constant display of the weather.

I urge you to give busy, responsible citizens what they want--in this case XM Radio Weather and Traffic. I would urge big business to learn to XM Radio and look at what their listeners want--they might learn something.

Thank you

William Boyd  
Portage, Indiana
